

MCG WHEELIE BINS

Plastics SA A proud Polyco member

MCG Industries is a proudly South African manufacturer of various injection moulded crates, wheelie bins, various containers, pallets and specialized products that has been serving the market for over 50 years. We serve diverse markets that include beer, soft drinks, agriculture, dairy, bread, baked goods, meat, fish and poultry. We also have a range of seats designed for auditoriums and stadiums.

Our crate manufacturing facility has been awarded ISO 9001:2015 accreditation, a globally recognized quality framework which helps us consistently provide products that meet customer and regulatory requirements. This framework has also been implemented in our other manufacturing facilities to ensure MCG delivers premium, quality products to all our customers.

MCG has the ability to assist customers with their packaging requirements from concept, through the design and development phase right up to product realisation.

Moulding the Future.
Sustainably.

OUR COMMITMENT TO ENVIRONMENTAL SUSTAINABILITY

Sustainability

We have established ourselves as a global leader in sustainable innovation, collaborating with industries to redesign systems that eliminate waste. Our unwavering commitment to environmental protection and the preservation of materials at their peak value drives our actions.

Memberships and Affiliations

- Member of Plastics SA, a federation that promotes plastics in South Africa, including environmental initiatives that benefit the industry and society.
- Member of Polyco (The Polyolefin Recycling Company), a non-profit industry body formed by polyolefin converters themselves to promote the collection and recycling of post-consumer polyolefin packaging containers.
- ISO 9001:2015 accredited at our Malvern plant and SANS 1494:2023 accredited at our Isando plant.

Recycling

The recyclable materials we acquire from our customers undergo a rigorous process of granulation, washing, and drying before processing, ensuring the highest levels of quality for reuse.

We strongly encourage all our customers to fully embrace a culture of recycling by purchasing back wheelie bins.

Strategic Initiatives

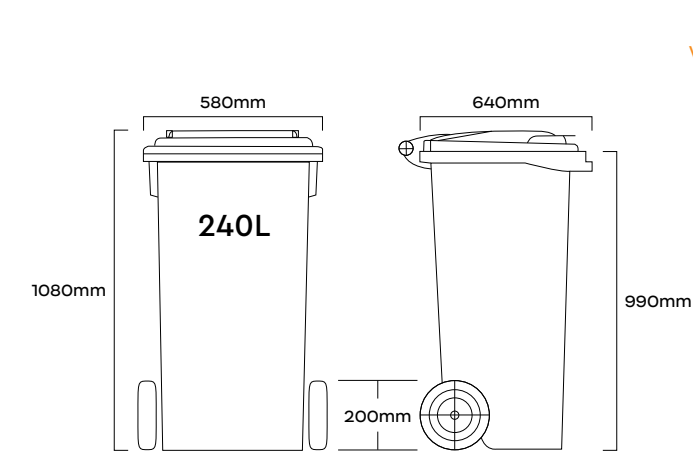

- MCC are proud to drive external programmes on circular economy philosophies to prevent landfill by developing partnerships with our valued customers by purchasing damaged products to recycle into high quality products.
- We adhere to the Extended Producers Responsibility Programme ensuring that we take full responsibility for the lifecycle of our products.
- We are committed to continuous innovation and skills development to achieve a circular economy.
